

Strengthening Staff Skills: Engaging with Men, Women and Children in Supervised Visitation Centers

February 11, 18 & 25, 2010
4:00 - 5:15 PM Eastern Time

Developing and sustaining a visitation center that is fair, respectful and promotes safety for children and their mothers who are battered women is an important goal, but this can be easier said than done! It requires staff that can encourage and support a problem-solving, safety-oriented partnership with children, mothers and fathers. And even the most experienced among us can be challenged by the skills required to be engaged with families in this way. Please join us for this audio conference training series to explore skill development in areas that commonly present dilemmas for Center staff.

Part 1: De-escalation and Conflict Management
February 11, 2010

Part 2: Listening and Engaging in Dialogue
February 18, 2010

Part 3: Decision-making in Supervised Visitation Centers
February 25, 2010
